

12 Project Summary

**Enterprise Applications
Account Compromise Remediation
Principle of Least Privilege**

- SilverSky will compile and review the information gathered, then analyze and document in detail the findings and any test results in a draft iteration of the final reports

- All findings will be compiled into a report that includes issues and misconfigurations, potential paths to exploitation in Active Directory, and recommendations for remediation

33 Acceptance

Delivery of all stated project deliverables will constitute acceptance of services provided under this SOW
